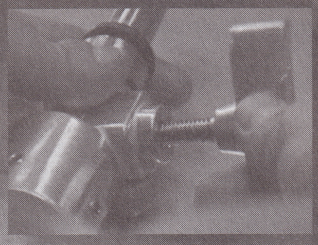
HARDWARE



CHAPTER THREE

Matthellini Clamps

Provides strong, solid gripping of round, square, or rectangular tubing and many other common and irregular shapes. Features ergonomic handle design and reinforced jaws, and the shaft is 1010 chrome plated steel. Available with 2" or 3" Center Jaw and 2" or 6" End Jaw. The Center Jaw has a fixed jaw mounted at the base of the Baby Pin portion of the shaft providing strong support for the pin. The End Jaw has the fixed jaw mounted at the end of the threaded portion of the shaft. Superior in tight places!

SIZE COMPARISON

Extendellini

In response to the industry's requests for an increase in the gripping range of Matthews popular Matthellini line of clamps, Matthews now introduces the 'EXTENDELLINI' with an increased gripping range of nearly 10 inches.

By simply removing the movable jaw, spin handle and bushing from the Matthellini Clamp and securing the new Extendellini to the thread of the clamp you will increase your gripping range by almost one foot. You can now safely secure the extended clamp and fixture to an even wider variety of objects.

Like the Matthellini Clamp, the Extendellini is a precision machined, chromed product for durability and ease of operation. The Extendellini works with both the 2" and 3" Center Jaw Matthellini or Cardellini Clamps.

Mafer Clamps®

Super Mafer Clamp®

Strengthened to withstand greater clamping pressure than any other clamp of its kind, the Super Mafer Clamp is now even more diversely effective. The protective pads in the jaws have been reformulated for better gripping action. Because of its superior strength, several new attachments have been added.

SUPER MAFER CLAMP

Double Super Mafer Clamp®

The Double Super Mafer allows the use of two Mafer attachments with one clamp. The castings and the reformulated protective pads in the jaws are now strong enough for us to be able to make this Double Super Mafer Clamp. Use a Hollywood Superflex Arm at one end and a 5/8" Baby Pin with a light fixture at the other end, or do the reverse and use the small light fixture on the Superflex Arm and a Grip Head with Gobo Arm and Flag on the other end. *The possibilities are endless!*

Magic Finger®

The Magic Finger has become one of the most popular grip accessories of all time. The 5/8" pin attached to the ball joint pivots from -15° to +90° while the collar rotates 360°. All axis lock positively with one locking handle. The stand mounting portion has an outside diameter of 5/8" to fit into a Junior Receiver, while the inside is bored to mount on a 5/8" pin. The Matthews Magic Finger is machined from one solid piece of steel which allows for the strongest, safest product of this type available. Knockoffs of the Matthews Magic Finger are made from two pieces of steel that are bolted together and do not offer the unitized characteristics of the Matthews product.

CATALOG #	DESCRIPTION	LBS	LIST PRICE
388210	Magic Finger with 5/8" Adapter	2	$96.00

GOBO Arm with Magic Finger®

One of the most popular grip accessories of all time has been incorporated into a 40" Gobo Arm. The ball joint on the Magic Finger pivots from -15° to +90° while the collar rotates 360°. U.S. PATENT # 5,806,821

CATALOG #	DESCRIPTION	LBS	LIST PRICE
388211	40" Gobo Arm with Magic Finger	3.25	$125.00

Knuckle Head

The ultimate positioning device. Mounts to 5/8" male or 1-1/8" female, and is internally threaded 3/8-16 to support standard camera accessories. It rotates in all axis and will easily support up to 15 pounds. Made for Dots, Fingers, Flex Scrims and small light fixtures accepting 5/8" male. Add the Scrim Flag Adapter (Matthews #540023 on page 63) for Flags and Scrims.

CATALOG #	DESCRIPTION	LBS	LIST PRICE
540024	Knuckle Head	1	$44.00

Broken Arm®

More versatility, faster setups and finer adjustments are three things desired most on a set. Adding the Broken Arm to any equipment request will do just that. Used like any other Gobo Arm, the Broken Arm incorporates the 2-1/2" Head and can hold all the same items, but it has the unique ability to change its position and rotate 360° in two axis. Now a Cookie, Scrim, Flag or small lighting fixture can be repositioned in just nanoseconds.

Accessories

Gag & Double Gag

The Gag is the combination of two sets of Grip Head Plates on one shaft, and with one locking spin handle. It serves many purposes, such as making a yoke with a Grip Head at each end or converting a Double Extension Arm to a Triple Extension Arm, feathering two Open End Scrims for a graduated lighting effect. The Double Gag combines two Grip Heads onto one 1/4" mounting shaft and allows each head to be locked individually.

C Clamps

Matthews C Clamps are available in 4", 6", 8", 10", and 12" with or without 5/8" mounting pins or Junior Receivers. Each clamp has a steel channel welded to both sides of the opening for better and safer locking. Clamps made for mounting Baby fixtures have two separate pins at different angles so that the light fixtures may fit with minimal clearance. Junior Receivers are made in two fixed versions, Horizontal and Vertical and a Universal Mounting Junior Receiver which can be used in any one of eight different positions.

Matthews C Clamps are manufactured from premium drop forged steel. It should be noted however, that since the Matthews clamp is an adaptation of a standard C Clamp, there is no effective warranty on the part.

Speed C Clamp

Taking a standard 10" clamp and adding Speed Rail fittings makes this clamp one of the most versatile. Clamp adjusts from 10" to 20'. Riding on standard 1-1/4" Speed Rail this multi-purpose clamp can make any rigging challenge easier. Matthews C Clamps are manufactured from premium drop forged steel. It should be noted however, that since the Matthews clamp is an adaptation of a standard C Clamp, there is no effective warranty on the part. Black only.

439013	Speed C Clamp	7.5	$180.00

Clamps

Furniture Clamps

Available in 6" to 36" lengths. Also known as Bar Clamps, a rough adjustment is made by releasing the spring loaded lock and sliding the adjustable half of the clamp over the serrated bar. Final tightening is done with the worm screw handle. The Bar Clamp Adapter, included, slides over the bar and tightens with two thumb screws. Bar Clamp Adapters are also sold separately.

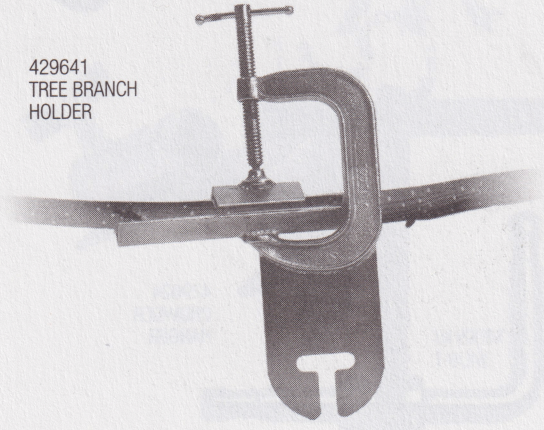
POULTRY
BRACKET

Poultry Bracket

Need a Junior as a backlight, but can't use a light stand because it can't be hidden behind the telephone pole that is in the shot? Use the telephone pole as your light stand. Or use a street lamp or a tree trunk! The Matthews Poultry Bracket turns all of these into instant light stands. Made with a 1-1/8" Junior Receiver at the end of the arm with a 5/8" pin directly below it, even a cutter can be mounted from the same bracket.

CATALOG #	DESCRIPTION	LBS	LIST PRICE
429020	Poultry Bracket	12	$191.00



429641
TREE BRANCH
HOLDER

Tree Branch Holder

Tree Branch Holders enable the user the opportunity to use a real tree branch instead of a cello or wood cookie. Allowing for natural branch movement, it also hides a multitude of problems when placed in the foreground of a shot, or should the shot require, coming in from the side.

SPIKE JR.

BAZOOKA

Most film studios have very high ceilings and catwalks from which much of the lighting is done. Catwalks, also known as decks or greens, can be raised or lowered depending on the set. Catwalks have safety railings and there are usually holes drilled at the edge of the deck about 18" apart. The "L" bracket of the Bazooka fits over the safety railing while the bottom pin fits into the hole in the deck, providing a stable base on which to mount a lighting instrument. The Bazooka terminates in a 1-1/8" Junior Receiver.

Grip Helper

The Grip Helper is a combination of several adapters in one. The Junior Pin of the Grip Helper mounts into a light stand, and the Junior Receiver allows the mounting of a light fixture without upsetting the center of balance. In between there is a 3' to 6' telescoping Extension Arm fixed at a 45° angle with a 4-1/2" Grip Head attached. By using the Grip Helper, a large light fixture and Diffusion Frame up to 48"x 48" can be used from the same stand.

Wall Spreaders

Wall Spreaders are used in both vertical and horizontal positions. They are placed at each end of either a 2 x 4 or 2 x 6 precut piece of lumber. The Wall Spreader is a two piece system, one is simply a receptacle for the lumber with a padded flat plate welded to it to protect the wall or ceiling and the other is a receptacle for lumber and a telescoping piece to insure a tight fit. CAUTION: Because lumber sags over long lengths and when weight is added, the entire structure may become loose and could come down. To avoid damage to the wall or ceiling, plates should only be used directly in line with studs.

CATALOG #	DESCRIPTION	LBS	LIST PRICE

TRAPEZE

Trapeze

Obtaining its name from the obvious similarity to its circus counterpart, not just because of its look, but also its function; the Trapeze is used to "fly" a lighting instrument, chandelier or other practical light into a set usually from a grid or catwalk on the center ring via either rope, chain or cable. The ring welded at each end of the Trapeze is for attaching positioning ropes.

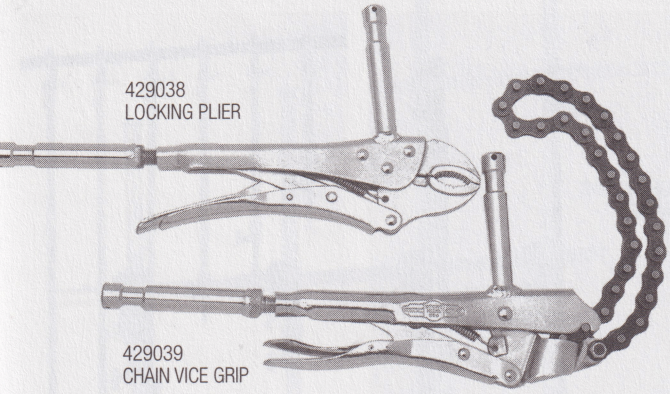
429683	Mini Meat Axe	8.25	$186.00



429038
LOCKING PLIER

429039
CHAIN VICE GRIP

Chain Grips & Locking Pliers

The Chain Grip provides maximum gripping power on any size pipe up to 6" in diameter. The Locking Plier also provides maximum gripping power on both flat and round surfaces with smaller diameters. EXTREME CAUTION must be taken when the 5/8" pin provided on the adjustment screw is used. Be sure that any off-center weight is toward the locking direction (clockwise); allowing more weight on the other side could loosen the jaws.

We use only real Vice Grip products. Don't be deceived by cheaper imitations.

529604
EXTENSION EAR SET OF 3

Extension Ears

One of the problems generated by a light source such as a 12K or larger is the tremendous heat transmitted from the front of the light. Using stainless steel diffusion is not a problem; however, when trying to diffuse the source with silk or lighting control filters, extreme temperatures will destroy these materials. The Extension Ear will allow the diffusion to be positioned a distance away from the light source, thereby avoiding the intense heat and creating an even spread of the light.

CATALOG #	DESCRIPTION	LBS	LIST PRICE
529604	12K Extension Ear (set of 3)	4.5	$675.00

Hangers

Lightweight Telescoping Hangers

Designed for use with lightweight fluorescents or other fixtures weighing no more than 25 lbs. (11.4kg.) Engineered to telescope from a grid with nominal ceiling clearance. Telescoping Hangers are available in a wide range of lengths and attachment options for both temporary and permanent placement of lighting fixtures. Constructed of aluminum and cast aluminum fittings. Hanger will accept all pipe clamps currently manufactured. Size and weight is less than 50% of conventional hangers. Hangers come standard with Bolt Mount.

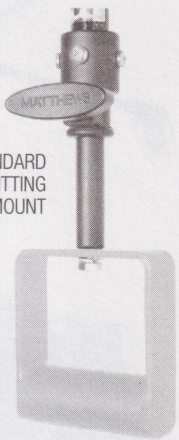
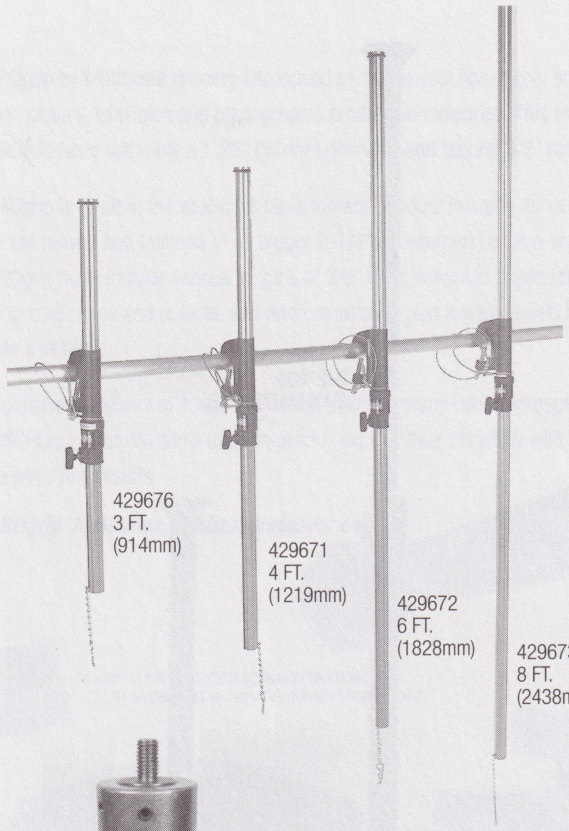
1' TO 2' LIGHT WEIGHT TELESCOPING HANGER



STANDARD FITTING BOLT MOUNT

429779
5/8" BABY PIN WITH 3/8" THREAD



Heavy Duty Telescoping Hangers

Telescoping Hangers have a very substantial pipe clamp to attach to a lighting grid. The pipe clamp has been slightly offset, to allow the riser or drop down tube to slide up when there is sufficient room between the grid and the ceiling. It is therefore possible for a 3' Single Extension Hanger to go from a few inches below the grid to the fully extended 3 feet. Matthews Telescoping Hangers are available in single stage and double stage. All terminate in 1/2"-13 female thread to permit the attachment of several hanging accessories listed below.

Matthpoles

Matthews Matthpoles are stronger and more durable than any similar product. Unique "expanding casting" provides the pressure for holding the Matthpole in place. Used primarily in studios for mounting seamless paper and backdrops with the use of Super Mafer Clamps and Swivel U-Hooks; the Matthpole has also been used in a horizontal position behind the President of the United States to support small lighting fixtures, in campaign venues for many candidates, and probably in many places we don't even know about. Manufactured in three overlapping sizes, Matthpoles can be used in openings as small as 30" to 178" which is almost 15 feet without the need for extensions.

CAUTION: Because tubing can sag over long lengths and when weight is added, the Matthpole may become loose and could come down. It is therefore recommended that vertical Matthpoles with two Super Mafer Clamps mounted at right angles with a #209635 Swivel at each end be used to support the horizontal Matthpole. To avoid damage to the wall or ceiling, Matthpoles should only be used directly in line with studs.

MICROgrip

MICROgrip by Matthews is being introduced as the newest line of grip and mounting products developed especially for the motion picture, television and photographic production industries. This broad range of products has been developed around the MICROgrip head with only a 1.25" (32mm) diameter and tapped 3/8" rods of various lengths.

MICROgrip is great in the studio for table top and product imaging as well as miniature work. The micro-griphead allows all of the moves and features of its bigger 2-1/2" counterpart but in a smaller package. Accessories to the MICROgrip head include various lengths of 3/8" rods, weighted bases for increased stability, clips to hold props and objects, and micro shot bags plus a wide variety of micro scrims and flags.

The creative professional image maker will discover many uses and applications for MICROgrip that will allow them to quickly expand their creativity with more satisfying results

MICROgrip. Matthews smallest endeavor ever!

MICROmount

A further development by Matthews from the MICROgrip series of products is the highly maneuverable and versatile on-camera light/monitor mount called MICROmount.

MICROmount is a light/monitor mount utilizing two of the microgrip heads and three lengths of 3/8" rod to create a highly flexible mount. This will allow the photographer to get the on-camera light up from the camera body thus enabling the light to be positioned to either side and creating the more desirable 'dimensional' lighting effect rather than 'flat' lighting. While the basic MICROmount light/monitor mount is supplied with three 4" rods, the creative photographer can add longer rods to create dramatic and creative lighting effects with the on-camera lighting fixture.

The MICROmount light/monitor mount will also serve as an on-camera monitor mount as its flexibility will allow for the monitor placement to be almost anywhere! Add just a few more MICROgrip components and the MICROmount can support an on-camera light *and* monitor or even two monitors from the same support system.

MICROmount *— It's new, it's clever, it's strong, and of course, it's by Matthews!*

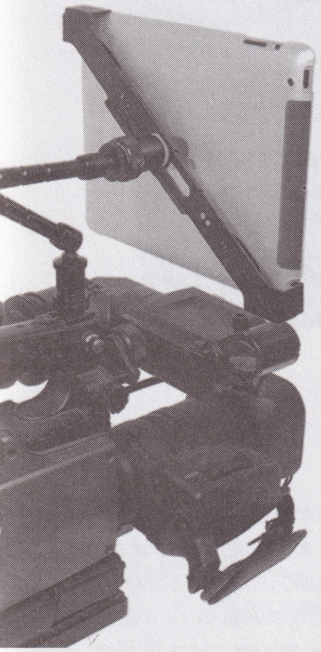
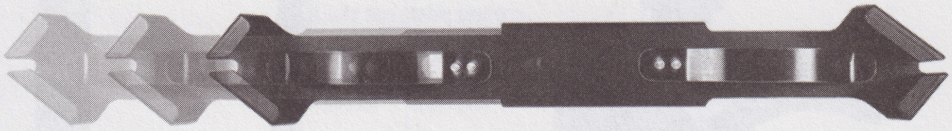
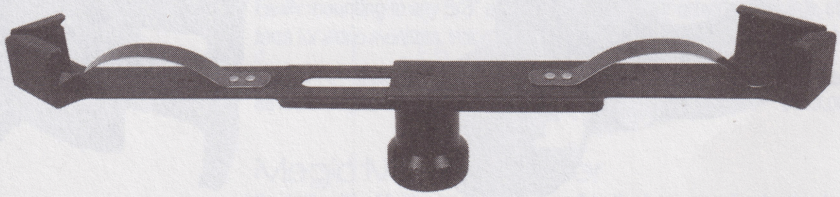
The 'MUT'...Mount Any Breed of Tablet or iPad®!

Whether you're on location, on set, or at your desk, the Matthews Universal Tablet Mount or 'Mut' provides a simple yet reliable mounting solution for your tablet or iPad® regardless of the model. The 'Mut' allows Tablet or iPad users to mount their device with or without a protective case as it will adjust from 10" to 13" long and 1/8" to 3/4" thick.





Teflon coated, adjustable steel bracket with spring steel pressure points.



The 'Mut' affixes to most brands easily and provides maximum holding strength and reliability. Additionally, the 'Mut' works with most standard mounting devices as it comes with a 1/4-20 female threaded hole on the back of the bracket.

Flimsy molds or specified tablet/iPad model mounts are no longer necessary with the Matthews Universal Tablet mount 'Mut'. Buy one mount that will last you through generations of technology development and you can thank us later. The mount comes in three different kits that will allow you worry free "set it and forget it" technology that Matthews has offered for the last 42 years...

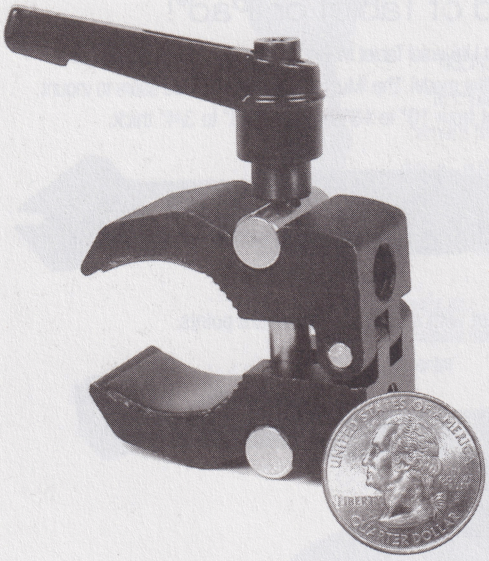
MICROgrip Mounting Solutions



MICROclamp

Taking after his father the Mafer Clamp with both strength and versatility, the Matthews MircoClamp is the newest addition to the MicroGrip family. The MicroClamp can grip to round or flat surfaces, as well as many other objects or shapes one may find on set. It's reduced size and dual 3/8" and 1/4" mounting holes give it extreme flexibility. Its strength is derived from a precision aluminum extrusion, it's high performance stick pads and an aluminum locking kip handle. The MicroClamp is a must have in your bag of tools.

Smart Phone Adapter

The Smart Phone Adapter utilizes MicroGrip technology and two brackets allowing secure and precise mounting of the most popular smart phones on the market. HTC, I-Phone 1-4, I-pod Touch, Samsung, and LG are just a few of the devices one may mount with the Matthews Smart Phone Adapter. Use this adapter to take full advantage of the applications (apps) one may use on set, location, in the studio, or even on a vehicle. Components of the New MicroGrip line allow mounting with 3/8" rods and clamps.

Monitor Stand

The ultimate in Matthews monitor mounting systems. Whether in the studio or on location the Monitor Stand will easily roll to the desired position. Height rises from 3 foot for use at the console to 6 foot on location. Lock the monitor position at any desired angle with the Magic Finger and the sturdy, braced stand ensures a safe and stable platform.

CATALOG #	DESCRIPTION	LBS	LIST PRICE
H861861	Monitor Stand	26	$500.00
H386024	Stand Only	23	$376.00

Monitor Holder

Easily mounting to any 5/8" pin, the Monitor Holder provides a sturdy, stable platform for video monitors. Velcro straps required to tie down the monitor are included.

CATALOG #	DESCRIPTION	LBS	LIST PRICE
861828	Monitor Holder	3	$113.00

Magic Monitor Holder

By adding the Matthews "Magic Finger" to the basic monitor holder, the monitor can be easily and safely tilted to accommodate the operator/viewer's position. Mounts to any 5/8" stand's pin.

CATALOG #	DESCRIPTION	LBS	LIST PRICE
861829	Magic Monitor Holder	5	$225.00

Flex Monitor Holder

The addition of the Matthellini clamp will allow the Flex Monitor Holder to be used almost anywhere. Lock it off on a jib arm support or tripod leg and adjust the monitor to a comfortable viewing angle.

Monitor Mount
with 75mm &
100mm VESA
Mounts

CNC machined from 6061T-6 aluminum billet, Matthews now offers the strongest, most versatile and compact monitor mount available. Because it's not a casting, this mount will support any size monitor that does not exceed 65lbs. (30kg). Works with light stands, C-stands, or any other mounting device with a 5/8" baby pin. Folds flat to monitor for storage and transportation. It can also be used with Matthews catalog #425162 Baby Grid Clamp for mounting to truss as shown below.
